

M38XCE-T

Dry Shipper Temp Loggers

The M380CE and M385CE Temperature Loggers are designed to monitor and record the temperature of cryostorage dry shippers, specifically the CX100, CX500 and CXR500 models.

Logger Type	Plug Diameter
M380CE	71mm / 2.78"
M385CE	216mm / 8.5"

Key Features:

- Measures temperatures ranging between -199°C to +40°C.
- Easy installation, the temperature logger simply replaces the neck plug of the dry shipper.
- Can log up to 16,000+ records (non-volatile storage).
- Adjustable logging interval from one to thirty minutes.
- A minimum battery life of five years.
- LED status indicators inform the user of logging status, temperature alarms and tipping alarms.
- CryoWatch software allows for access to collected data, monitoring and checking battery life.
- Data is outputted into a PDF or Excel Spreadsheet with a graph of logged temperatures.
- When the logger is not in use, maximise battery life with STANDBY mode.

Our loggers feature a Tilt Switch that detects and records when the dry shipper is tilted by more than 60° degrees to determine if it has been transported correctly.
